

THERMOSTAT HC90

Digital, programmable, App-control on Wi-Fi

HC90 combines a simple and stylish design with easy operation via touch buttons. The buttons are discretely marked on the front with explanatory text above.

Setting up and setting the thermostat is easy and intuitive thanks to the large and clear display.

If you are away from home for a longer period, you can use the Holiday mode in the thermostat, which lowers the temperature in the home to a desired level for a specified period.

When you use the weekly programs in the thermostat, the adaptive function will ensure that the temperature and thus the comfort is always present again at the specified times.

With a connection to the app, the thermostat can be controlled and adjusted regardless of whether you are sitting in the living room or on your way to the summer house and want to turn on the heat.

TECHNICAL DATA

Supply Voltage	85-265V / 50-60Hz
Max. load	3600 W (16A)
IP class	IP21
Temperature range	+5° C ... +50° C
Sensor settings	Room / Floor / Room w. floor as limitation
Display	2,8" backlit LCD
Floor sensor	10 KΩ @25°C, length 3m
Colour	White RAL9003 • Black RAL9005
Installation	60 mm Euro back box
Dimensions	87 x 87 x 42 mm
Warranty	3 years
Approvals	CE • RoHS • UKCA • Lot20 Ecodesign

FEATURES

- Temperature limitation min/max
- Logging of energy consumption
- Backlit large display
- Calibration of room and floor sensor
- Open window detection
- Key lock
- Adaptive heating
- 4 timed events
- WiFi
- Lot20 Ecodesign
